

10. CONSIDERATION FOR PROJECTS SUBJECT TO LAND USE PLANS

The Project lands, local and surrounding do not fall within any of the following:

- Greenbelt Plan Protected Countryside
- Greenbelt Plan Natural Heritage System
- Oak Ridges Moraine Conservation Plan Area
- Niagara Escarpment Plan Area
- Lake Simcoe Watershed Plan Area.

No project components are located within any of the above protected planning areas. The project location is adjacent to the Niagara Escarpment Development Control Area and DWP has and continues to consult with the Niagara Escarpment Planning Commission (see Consultation Report). A visual impact assessment from various vantage points along the Escarpment has been prepared and a draft has been submitted to the NEC. When completed, DWP has committed to posting the visual impact assessment on their website so the public can access this information.

Figure 1 shows the Niagara Escarpment Plan boundaries in comparison to the project location of the proposed wind facility.
