

1. INTRODUCTION

The Dufferin Wind Power Project is currently being developed by Dufferin Wind Power Inc. (DWP). The proposed wind farm (the “project”) will consist of 18 General Electric (GE) 2.75 MW and 31 GE 1.6 MW wind turbines for a total of 49 wind turbines and a 99.1 MW nameplate capacity. The wind farm project components will be situated entirely on privately owned land that is currently under agricultural production, pastureland or land that has been left fallow.

The project will require approval under *Ontario Regulation 359/09 – Renewable Energy Approval (REA)* under Section V.0.1 of the *Ontario Environmental Protection Act*. The REA process replaces previous requirements for several separate approvals under (among others) the *Environmental Assessment Act*, *Planning Act* and *Environmental Protection Act*. Based on the REA Regulations, this project is a “Class 4” wind facility.

This Natural Heritage Assessment (NHA) Records Review Report was completed in partial fulfillment of the regulatory requirements for *Ontario Regulation 359/09*. Additional details regarding the natural features, their significance, potential impacts and mitigation measures required to protect these features will be provided, as required, in separate reports, including the Site Investigation, Evaluation of Significance and Environmental Impact Study Reports. These reports will be submitted to the Ministry of Natural Resources (MNR) for review and comment, as required in *Ontario Regulation 359/09*. Discussion of Species at Risk, fish habitat and other information needs, as outlined in the MNR’s Approval and Permitting Requirements Document for Renewable Energy (MNR 2009), are discussed in a separate report, under direction from the MNR and in compliance with the *REA*.

Additional information about the Project can be found in the *Construction Plan Report*, *Design and Operations Report* and the *Project Description Report*. Technical studies associated with the REA requirements have been completed. In addition to this report the draft REA submission package includes:

- Project Description Report;
- Construction Plan Report;
 - Archaeological Assessments;
 - Cultural Heritage Self-Assessments;
 - Cultural Heritage Assessment;
- Design and Operations Report;
 - Noise Assessment Report;
 - Environmental Management Plan;

- Emergency Response and Communications Plan;
 - Post Construction Monitoring Plan;
- Wind Turbine Specification Report
- Decommissioning Plan Report;
- Property Line Setback Assessment Report;
- Water Body and Surface Water Assessment Report;
- Natural Heritage Assessment Reports;
 - Site Investigation;
 - Evaluation of Significance;
 - Environmental Impact Statement; and
- Supporting Documents.
